

Pipe-Flange Inspection Tool Kit

Measures: 13" x 8" x 3"

Cat # 12F

*Specifically Designed By
Pipe-Flange Inspectors!*

Inspection Tools Include:

Measurement Scale: Inch / Metric

- **V-WAC Gauge** - Measures porosity, crowns and undercuts/pits to 1/4 inch. Let us know if you'd prefer **Inch or Metric**.
- **7-Piece Fillet Weld Set** - Checks the leg and throat for fillet welds. Measurements go from 1/8" to 1 inch. Let us know if you'd prefer **Inch or Metric**.
- **HI-LO Welding Gauge** - Measures the internal and external misalignment. It can also measure crown heights, pipe wall thickness, fit-up gap and bevel on end preparation. Comes with both **Inch & Metric**.
- **Burk Flange Alignment Tool** - Checks for proper gasket crush of 150 to 1200 lbs flanges. Side scales check external misalignment of flange. Can only be used on spiral wound gaskets. The Burk Flange Alignment Tool is available in **Inch only**.
- **6" SPI scale / ruler**. Let us know if you'd prefer **Inch or Metric**.
- **Intrinsic Flashlight** - Flashlight is designed to mitigate sparking that could otherwise ignite elements in a hazardous environment.
- **Inspection Mirror with Magnetic Pick-Up** - TWO handy tools in one! 1" x 2" Oval Mirror is held firmly in place at all angles. 5-5/8" to 20-3/4" telescoping reach. Powerful long-life magnet.
