

Gap Wedge Gauge

Ensure the perfect Gap and Fit-Up!

Pipe Welding procedures require setting specific Gap Widths. Fitters and Welders currently achieve Fit-Up with Wedges and Gap Rods -- a slow, imprecise process. Ensure the perfect Gap and Fit-Up while minimizing internal misalignment on your pipes with the Stepped Spacing Gap Wedge & Gauge.

This one durable precision tool replaces wedges and gap rods and can be used in every industrial pipe fitting scenario. It can hammer in, pry open and gauge a desired gap allowing fitters to quickly set a consistent gap and welders to place a higher quality root pass faster.

The Gap Wedge Gauge is available in various widths and lengths:

3/4" x 3" • 1 1/4" x 6" • 1 3/4" x 8"
