

DATASHEET

FLAT STRAIGHT BRUSHES

The PCWI range of Flat Straight Brushes are suitable for all High Voltage Porosity Detectors, Holiday Detectors, Spark Testers and Jeepers. All brushes are manufactured with 100µm rippled brass wire which provides greater brush strength. The range of brush width sizes is extensive, ranging from 50mm to 1000mm.

FEATURES

- Brush sizes from 50mm to 1000mm (2" to 39")
- Fan brushes, adapters and handle extension pieces available for most brands and models
- 100µm brass wire
