

PosiTector 6000 Thick Series Probes

Coating Thickness Probes for THICK Protective Coatings

DeFelsko supplies a full range of probe offerings for coating professionals. Recent additions have increased the selection of PosiTector® probes for measuring thick applications.

Here's a summary:

Probe	Upper Range	Example Applications
FT/FNT	6 mm (250 mils)	pipe coatings, bedliners
FHX	10,000 µm (400 mils)	Full thickness range of hot or rough coatings on steel up to 250° C.
FK/NK	13 mm (500 mils)	sprayed polyurea, tank liners
FL	38 mm (1.5")	intumescent paint and insulating coatings
FNG	63.5 mm (2.5")	thick polyurea, fairing compounds used in super yacht manufacturing
