

TRAMEX MOISTURE METERS & THE WOOD INDUSTRY.

Tramex have been manufacturing moisture meters for the Wood Industry for more than 30 years. We supply individual moisture meters, as well as complete kits. These instruments are an essential part of a Wood Professional's toolbox.

The importance of determining moisture content.

The three main reasons for controlling moisture content in wood are:

- To minimize problems due to dimensional change or distortion which can be caused by moisture loss or gain by the wood or wood byproducts when in use.
- To enable efficient processing such as milling, machining, gluing, laminating, spraying and painting.
- To prevent deterioration and decay, ensuring adequate strength.

Tramex moisture meters will enable you to diagnose and avoid moisture-related problems in wood and wood-based products.

**WHY TAKE RISKS? TEST WITH TRAMEX,
LEADING INNOVATION IN MOISTURE DETECTION.**

WOOD

PIN-TYPE MOISTURE METERS

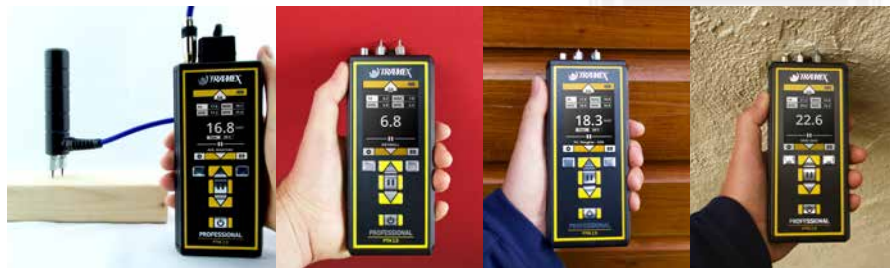

PROFESSIONAL PTM 2.0

The Professional PTM 2.0 is a hand-held, digital, pin-type resistance moisture meter designed to take precise measurements of moisture content in wood, relative drywall readings and comparative WME (Wood Moisture Equivalent) readings in wood by-products and other building products. The Professional PTM 2.0 has built-in standard calibrations, specific calibration for over 500 wood species and adjustable temperature correction.

FEATURES

- Built-in calibration for 500+ wood species or standard calibration selection.
- Wide moisture content range: 6 - 46% and digital readout to 0.1% accuracy
- Adjustable temperature correction
- Built-in calibrations checks for confirmed accuracy
- Reading 'Hold' facility
- Save up to 100 readings for max, min, average and standard deviation statistics
- Colour LCD screen with brightness adjustment for low-light operation
- Heavy-duty, light-weight aluminium construction
- Built-in socket for use with a choice of external pin probes (optional)

Product order code: PTM2

PROFESSIONAL WOOD EZ KIT

A kit for instant and accurate measurement of moisture content in a large range of wood species, relative drywall readings and comparative WME (Wood Moisture Equivalent) readings in wood by-products and other building materials. Featuring the Tramex Professional PTM with its built-in pins and a handheld heavy-duty pin probe, the Professional Wood EZ Kit comes in a protective Tramex Easy-travel case.

KIT CONTENTS

- PTM2.0 - Professional Pin Moisture Meter.
- Heavy-duty pin-type wood probe.

Product order code: PTMZK5.1

PROFESSIONAL WOOD MASTER KIT

A kit for instant and accurate measurement of moisture content in a large range of wood species, relative drywall readings and comparative WME (Wood Moisture Equivalent) readings in wood by-products and other building materials. Featuring the Tramex Professional PTM with its built-in pins, a handheld heavy-duty pin probe and a handheld heavy-duty hammer pin probe, the Professional Wood Master Kit comes in a Tramex protective heavy-duty carrying case with die-cut foam lining.

KIT CONTENTS

- PTM2.0 - Professional Pin Moisture Meter.
- Heavy-duty pin-type wood probe.
- Heavy-duty hammer pin-type wood probe.

Product order code: PTMMK5.1
